#### **DETAILED ACTION**

## **Drawings**

1. As per Applicant's request the following is provided as the basis for why a drawing is necessary: The drawings must show every feature of the invention specified in the claims. Therefore, all the features claimed (i.e. the packaged product including the flexible pouches, the wrapping material, outer container, cushioning material, etc.) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3728

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6, 9, 11-16 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Procter & Gamble Company (GB 2 369 094) herein after GB 2 369 094. GB 2 369 094 discloses a packaged product comprising: a plurality of flexible water soluble liquid-detergent-filled pouches; an outer container (box or tub with reclosable lid) for containing the liquid-detergent-filled pouches; wherein the outer container contains a plurality of flexible liquid-detergent-filled pouches whereby at least two or more of the flexible liquid-detergent-filled pouches are in mutual contact (see page 6, lines 16-26), and wherein the outer container further comprises means (protective bag enclosing the pouches) for avoiding or minimizing rupture of the flexible liquid-filled pouches when the outer container is subject to shock.

With respect to claims 3 and 13, note the bag, see page 16, lines 1-6. The product-by-process limitation in claims 4 and 14 results in no structure that is different from GB 2 369 094.

With respect to claims 5-6 and 15-16 and the cushioning material, note the protective plastic or paper layers, see page 15, lines 25-28.

Art Unit: 3728

With respect to claim 11, GB 2 369 094 discloses that the outer container can contain a plurality of pouches in a random orientation whereby at least two or more of the flexible pouches are in mutual contact, see page 6, lines 16-20.

4. Claims 7-8, 10, 17-18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2 369 094 in view of Dull et al. (5,645,169). GB 2 369 094 as described above discloses all the limitations of the claims except for it is silent about the tub being injection molded plastic tub. Dull '169 discloses a packaged product comprising: a plurality of flexible water soluble liquid-filled pouches; an injection molded plastic outer container for containing the liquid-filled pouches; wherein the outer container contains a plurality of flexible liquid-filled pouches whereby at least two or more of the flexible liquid-filled pouches are in mutual contact, and wherein the outer container further comprises means for avoiding or minimizing rupture of the flexible liquid-filled pouches when the outer container is subject to shock. See Figures 1-15 embodiments. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the tub of GB 2 369 094 injection molded plastic tub as taught by Dull '169 for better protecting the pouches from environmental damage.

With respect to claims 7 and 17, note the corrugated cushioning outer sleeve (30) in Figure 3 embodiment of Dull '169, which will minimize rupture of the flexible liquid-filled pouches when the outer container is subject to shock. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made

Art Unit: 3728

to make the cushioning material of GB 2 369 094 corrugated cushioning material as taught by Dull '169 to provide better protection for the pouches.

#### **Conclusion**

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jila M. Mohandesi whose telephone number is (571) 272-4558. The examiner can normally be reached on Monday-Friday 7:30-4:00 (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (571) 272-4562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
